## Professional Summary

**Senior PHP Developer** with 5+ years of experience in designing, developing, and deploying high-performance, scalable web applications. Expertise in robust server-side development with **PHP** frameworks including **Laravel**, **CodeIgniter**, and **Yii**. Proven ability to build dynamic, feature-rich websites using **WordPress** with custom plugin and theme development. Strong background in managing complex data architectures using **PostgreSQL** and **MySQL**, with a focus on delivering reliable, maintainable, and measurable solutions. Combines solid software engineering fundamentals with practical expertise in full-stack web development.

## Technical Skills

Category	Technologies
Frontend	HTML5, CSS3, JavaScript, jQuery, Bootstrap, Tailwind CSS, WordPress
Backend	PHP, Laravel, CodeIgniter, Yii, RESTful APIs, Composer, OOP Principles
Database	PostgreSQL, MySQL, Data Modeling, SQL, Database Optimization
CMS & Web Platforms	WordPress, Custom Plugin Development, Theme Development, WooCommerce
DevOps/Tools	Git, Docker, CI/CD, Linux, Server Management, cPanel
Other	Software Engineering Best Practices, Debugging, Performance Optimization, API

## Professional Experience

### Full Stack Developer (Web Applications)

**Lonewolf Workforce, United States** | 01/2022 to 12/2023

- Engineered and maintained full-stack web applications using **Laravel** framework for robust backend services and modern frontend interfaces, resulting in improved performance and user experience.
- Developed scalable **RESTful APIs** using **PHP** and Laravel, handling high-volume data transactions for internal and external systems.
- Designed and optimized **PostgreSQL** database schemas, ensuring data integrity and improving query performance by 30% for complex reporting features.
- Built custom WordPress solutions with plugin and theme development to extend functionality for business requirements.
- Supported deployment, monitoring, and scaling of production services using Docker and cloud platforms, ensuring high availability for distributed teams.

### Senior PHP Developer (Web Solutions)

**National Group Ltd, New Zealand** | 02/2024 to 11/2024

- Designed and implemented web applications using **PHP** frameworks to automate business workflows and create efficient, user-friendly interfaces.
- Developed custom WordPress plugins and themes to extend platform functionality and meet specific business requirements.
- Integrated external APIs and third-party services using **PHP** and **RESTful APIs**, bridging traditional software systems with modern web solutions.
- Contributed to solution architecture, focusing on system scalability, maintainability, and adherence to software engineering best practices.

### Back End Developer (Web Applications)

**Ibex, United States** | 08/2019 to 10/2021

- Designed and implemented web applications using **PHP** and **CodeIgniter** framework to automate internal business processes and support queries.

- Diagnosed and resolved complex system issues using structured root-cause analysis across software and services, improving overall system reliability.
- Investigated and debugged issues within enterprise systems, focusing on data integrity, backend logic, and database optimization.

## PHP Developer

**United Wholesale Mortgage, United States** | 03/2021 to 10/2021

- Assisted in building and integrating **PHP**-based software components into existing enterprise systems, focusing on robust API design and integration.
- Collaborated with senior engineers to assess feasibility and business impact of new features, ensuring alignment with overall system architecture and best practices.

## Education

**Bachelor of Science in Computer and Information Sciences**

De La Salle University

## Hobbies

Playing chess - great way to unwind, destress, and keep the mind sharp.
